

Las Vegas Chapter ACI Membership

Like ACI International the Las Vegas Chapter - ACI is non-profit, industry consensus organization whose purpose is the **advancement of concrete technology through education**. Our Board of Directors and members represent all aspects of the construction industry - concrete producers, engineers, contractors, testing laboratories, public officials, material suppliers, educators, specifiers and designers all coming together to raise the bar for concrete construction.

Local contacts. Local practices. Local answers. As a Las Vegas Chapter ACI member you will have the opportunity to network with local concrete industry professionals and stay on the cutting edge of new and innovative concrete construction practices. The Las Vegas Chapter - ACI works continuously to improve the proper usage of concrete in our local construction projects. Through bi-monthly membership meetings the Chapter provides high quality speakers that present timely topics for our local market. Often you will recognize these speakers from World of Concrete or as Members of ACI National committees - those individuals who are actually writing the specifications you use everyday.

Education isn't always best in the "classroom", sometimes you have to see it! That is why the Chapter periodically offers "Demonstration Projects." We provide an opportunity for you to see actual hands on demonstrations of new technologies.

The Las Vegas Chapter - ACI is one of the most active Chapters for ACI certification in the country, offering nine ACI certification programs. In addition to certification testing, the Chapter also offers three training courses which helps to provide individuals with a more thorough understanding of testing procedures

The Chapter also sponsors the "Excellence In Concrete Awards Program" which is the only local event to recognize local construction projects specifically for their innovative or excellent use of structural or architectural concrete.

Through your membership you will also be helping to support the ACI UNLV Student Chapter. The ACI Las Vegas Chapter helps support these student members in many ways including funding for events; materials for projects; and field trips where they can see concrete construction in the "real world."

Here are few more reasons to join the Las Vegas Chapter - ACI:

- **Discounts on all Certification Training & Testing Sessions**
- **Discounts on registration fees for Membership Meetings and Local Seminars**
- **Earn Professional Development Hours (PDH's) for attending Membership Meetings**
- **Discounts on all ACI Publications - you must order through the Las Vegas Chapter ACI Office to receive the discounts**
- **Free Use of the Chapter's Technical Library which includes many popular ACI publications that are available for check-out**

Our industry becomes more complex every day and as a Las Vegas Chapter ACI member you can stay ahead of the curve. We invite you to join the Las Vegas Chapter of ACI by filling out the on-line membership application. If you do not wish to pay by credit card, please submit the application and we will contact you for payment.
